DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18, 19, 24, 28 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Cortese.

There is disclosed in Cortese a beverage extraction assembly, comprising: a support 18 connectable to a water outlet 29 of a beverage extraction machine, the outlet being formed in an injection nozzle assembly (water tube); a cartridge holder 48 removably mounted on the support for holding a cartridge 66, 67 containing a particulate substance, the cartridge comprising a first cartridge port 68 protruding outwardly from its upper surface for receiving water under pressure; a water inlet port 74 in the support and being connectable to the water outlet of the beverage extraction machine; a bottom aperture 50 in the cartridge holder; means (compressed fit) and o-ring seal 72 for providing a radial fluid-tight seal between the water inlet port and the first cartridge port; and a bayonet holder 62 on which the cartridge holder is securable.

Allowable Subject Matter

Claims 20-23, 25-27 and 30-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Piana and Cai are cited for their disclosure of the state of the art.
